

Genetic Consultation and Counseling

One workflow: From appointment scheduling
to consultation letters and billing.

GenLAB8 – Genetic Consultation and Counseling

One workflow: From appointment scheduling to consultation letters and billing.

Overview

Schedule all consultation hours and counseling appointments with the built-in calendar.

Create your medical documentation with anamnesis, diagnostics (e.g. ICD or HPO), files and images in a clearly organized patient file. Use this data for writing letters and medical reports.

Connect all counseled patients and conveniently manage multiple appointments.

You can create patient pedigrees and transfer them via interface to CanRisk.

Workflow

Requesting analyses with laboratory orders

Your samples from genetic counseling can be transferred directly to the laboratory with all necessary data. As soon as the laboratory results are available, you will be informed and can create the report.

- ✓ Align and control laboratory processes through sample notification
- ✓ Overview of the current status of your samples in the laboratory
- ✓ Transfer of laboratory results to the consultation file

Counseling letters and medical reports

Templates for consultation letters are automatically combined with the required data and content, such as pedigrees and images. Custom templates and text blocks can be used for various counseling types.

- ✓ Extensive formatting options for text and fonts
- ✓ secure, multi-stage approval process
- ✓ convenient delivery with various options (e.g. e-mail, fax or upload)
